

Vacancy Application Engineer (User Interface & GUI)

Our company

Axon Digital Design is specialized in development, manufacturing and selling of professional audio- and video equipment, specifically designed to serve the broadcast industry and its related industries. We work closely together with dealers and operate globally.

Axon is built on innovation and excellence, with a strong team of R&D experts whose experience and dedication is unrivalled. Actively and tirelessly pushing research and development to the foreground, our mission is to develop forward-thinking technologies that anticipate and satisfy the needs of customers – to save time, mitigate risks, dramatically reduce capital and operational costs and deliver competitive advantage.

Position

We are looking for an enthusiastic application engineer who fulfils a supportive role for the Marketing & Sales Department and Customer Support. You represent Axon in the implementation of custom made monitoring and control software. In this role you mainly focuses on the technical aspects of the products and their application. You are able to translate customer requirements in system configurations. In the post-sales role you work on realisation of customer projects and implements functionality as agreed with the customer. This will primarily be for Cerebrum related projects but can also include other type of products. Headquarters based in Gilze, the Netherlands. You will be traveling to our customers worldwide 30% of your time.

Tasks & responsibilities

- Responsible for successful implementation of customer projects within agreed budget and timelines;
- Approaching customers independently;
- Realization of customer projects involving Cerebrum panel design and (onsite) commissioning/support training;
- Provide additional Support resource when required and if time allows;
- Support Sales in preparing quotations for the product Cerebrum.

Job qualifications

- Higher National Diploma;
- Excellent knowledge of Windows 10, XML;
- Experience with building user interfaces;
- Knowledge of broadcast workflow and system design/build;
- Knowledge of broadcast operations;
- Knowledge of broadcast signal formats;
- Good presentational skills;
- Very good written and verbal communication capability in English.

Additional details about the product

Check our website and see what [Cerebrum](#) is about. We implement Cerebrum with many well-known broadcasters worldwide. Also, at Timeline, they use Cerebrum daily in their HDR UHD OB truck. Watch the [video](#) here.

**Offer**

- Independence and responsibility in a dynamic company with short communication lines;
- Flexible working hours;
- Company car;
- An excellent salary with social benefits;
- Pension plan, study budget.

Application
