

VACANCY

JUNIOR SOFTWARE DESIGN ENGINEER UK

Your position

We are looking for an enthusiastic engineer responsible for the design, implementation and testing of software applications. Working in a small team environment based in the UK near Wokingham, Berkshire you will be part of a larger department of engineers designing specialised products for the professional video and audio broadcasting market.

Tasks include:

- Review of software requirements
- Formulation of software designs and related implementation, consistent with existing designs and compliant to in-house style
- User interface design and scripting
- Preparation of specified test plans and test cases and related software testing
- Production of relevant documentation

Your qualifications

- Degree based qualification (or equivalent) ideally in Computer Science or Software/Electronic Engineering and with some commercial experience
- Strong command of object orientated programming and understanding of multi-threaded applications
- Experience in C++ for Windows platforms ideally using Visual Studio
- Good analytical and problem solving skills
- Good command of the English language
- Dynamic and flexible personality who enjoys working in a team
- Ability to work under pressure with good communication and interpersonal skills
- Knowledge or programming experience of the following would be an advantage:

Network protocols
Web based communication technologies
User interface design

What do we offer you?

- Independence and responsibility in a fast moving company with short communication lines.
- An excellent salary with social benefits
