

Vacancy Embedded Software Developers

We are looking for embedded software developers to expand our R&D department at our head office in Gilze.

If you just graduated or if you already have several years of work experience as an embedded software developer and would like to participate in the development of new technologies in the field of audio & video equipment, please apply.

Company

Axon Digital Design is specialized in development, manufacturing and selling of professional audio- and video equipment, specifically designed to serve the broadcast industry and its related industries. Some of our customers are Sky, BBC, NEP Broadcast Services, TF1. The head office of Axon is located in Gilze (NL). We have sales offices in England, Germany, France, China and Singapore and we work closely together with dealers worldwide.

Tasks & responsibilities

As an embedded Software Developer at Axon you make an important contribution to the further development of our products such as the Multiviewer and our new product Neuron. With Neuron it is possible to send real-time data over IP. Your work is mainly focused on the design and development of embedded, multi-threading, real-time, high-throughput software.

The R&D team consist of approximately 30 employees. You will participate in Agile multidisciplinary project teams together with software & firmware developers, architects, system test engineers and hardware engineers.

Job qualifications

- Bachelor or University degree Technical Computer Science or equal;
- 1 to 10 years of software development experience;
- Experience with the Linux OS and it's relevant development toolchain;
- Experience with OO modelling;
- Experience with multiple programming languages such as C / C++;
- Experience with a scripting language such as: Python, shell scripting, Makefiles;
- Experience with Agile development methods;
- Knowledge of video and audio technologies is an advantage;
- Affinity with electronics and hardware is an advantage;
- Creative, out-of-the box, pragmatic;
- Communicative, written and verbal in Dutch and English;
- A flexible team player who can also work independently;
- Able to understand quickly a technical domain and its complexity;
- Quality driven.

Offer

At Axon Digital Design we listen to your opinion and your input is of great importance. Together with the team you determine the further development of the software for our products.

We offer an informal working environment with short lines of communication, a challenging position with responsibility, flexible working hours and a competitive salary with social benefits like travel allowance, pension plan, sponsoring of fitness plan.

Application

Are you interested in this position and do you meet the qualifications, please send your motivation letter and resume to hr@axon.tv
