

## VACANCY (SENIOR) HARDWARE ENGINEER

### **Our company**

Axon Digital Design is specialized in development, manufacturing and selling of professional audio- and video equipment, specifically designed to serve the broadcast industry and its related industries. Some of our customers are Sky, BBC, NEP Broadcast Services, TF1. The head office of Axon is located in Gilze (NL). We have sales offices in England, Germany, France, China and Singapore and we work closely together with dealers worldwide.

### **Your position**

For our R&D team in Gilze, the Netherlands, we are looking for a Hardware Engineer. The R&D team is multidisciplinary and consist of approximately 30 employees working in Agile project teams. You will be working together with software architects, system test engineers, hardware-, software- and FPGA developers.

You are part of several project teams and you play a major role in the development and aftercare process regarding the production preparation, product quality, lifecycle management and manufacturability and testability. You are the technical contact person for the production companies and component suppliers and the point of contact for our warehouse. You take care of the collection, storage and maintenance of all product documentation (TPD, component library, PCB CAD layout and version management) and you take care of the release of products to suppliers.

### **Your tasks & responsibilities**

As a (Senior) Engineer you are responsible for:

- supporting product development, production, prototype construction, evaluation of tests and providing relevant documentation;
- transferring (new) products from R&D to production companies and setting up production tests;
- maintaining products in production for component life cycle management;
- monitoring product quality and contacting suppliers;
- managing development projects for non-regular products, often involving external parties;
- managing process improvement projects organized by R&D that run over the entire organization.

### **Your qualifications**

- Bachelor degree Electrical engineering / Electronics;
- experience with hardware development and component selection;
- experience with product development (preferably production aspects);
- experience with project management;
- experience with documentation;
- general knowledge of all R&D disciplines;
- good communicative skills in English, both verbally and in writing;
- living in the Netherlands;
- you are customer-oriented, stress-resistant and quality driven;
- you are problem solving, creative and flexible.

**Our offer**

- a challenging job in a dynamic working environment with short lines of communication;
- the opportunity to contribute to the development of innovative solutions for audio and video systems for the broadcast industry;
- flexible working hours;
- a good salary with social benefits;
- travel allowance, pension plan, study budget.

**Join the team, apply now!**
