

Vacancy System Test Engineer

Company

Axon Digital Design is specialized in development, manufacturing and selling of professional audio- and video equipment, specifically designed to serve the broadcast industry and its related industries. We work closely together with dealers and operate globally.

Axon is built on innovation and excellence, with a strong team of R&D experts whose experience and dedication is unrivalled. Actively and tirelessly pushing research and development to the foreground, our mission is to develop forward-thinking technologies that anticipate and satisfy the needs of customers – to save time, mitigate risks, dramatically reduce capital and operational costs and deliver competitive advantage.

Position

We are looking for a System Test Engineer for our R&D team in Gilze, the Netherlands. The team consist of approximately 30 employees and you will be working together with software architects, system test engineers, hardware-, software- and FPGA developers.

Tasks & responsibilities

As a System Test Engineer you are involved in the creation process of the product in an early stage. You deliver QA in all phases. You will reuse proven test strategies, methods and tools. The products under test are often embedded systems with a focus on VHDL and software.

As a System Test Engineer you will execute the product tests but you will also take testing to a higher level. You contribute to the rollout and perfection of continuous delivery and create the automation of tests. You work closely with our developers, product managers, customer support engineers and architects.

Job qualifications

- Bachelor degree Technical Computer Science;
- ISTQB certified, advanced level;
- Minimum of 4 years experience with (system) testing;
- Experience with QA technology and tools (Testlink, Robotframe, GitLab CI/CD);
- Practical knowledge of Python, (C++), Linux is an advantage;
- Experience with embedded systems with software, hardware and firmware;
- Experience with continuous delivery: start, maintenance and improvement of test frameworks and setups;
- Experience with Agile development methods like Scrum;
- Communicative, written and verbal in Dutch and English;
- A flexible team player who can also work independently;
- A multi-tasker with a helicopter view;
- Creative, pragmatic, solution-oriented;
- Quality driven.

Offer

- Independence and responsibility in a dynamic company with short communication lines;
- Flexible working hours;
- An excellent salary with social benefits;
- Travel allowance, pension plan, study budget.

Application
